Allianz UK & European Investment Funds - Allianz Strategic Bond Fund Share Class I (Acc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB00BJ1DZT42

Objectives and Investment Policy

The Fund aims to maximise total return primarily through investment directly in debt securities or by gaining exposure indirectly through the use of derivatives. The Fund will invest globally although at least 80% of its assets shall be invested in GBP denominated (or hedged back to GBP) debt securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest up to 100% of the Fund's assets into conventional fixed income securities and indirectly through the use of derivatives. Up to 50% of the fund's assets may be in high yield securities and unrated securities of similar credit quality. More than 35% of the value of the property of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United States of America. Up to 30% of the fund's assets may be in China via RMB currency exposure. We may also invest up to a maximum of 10% of the

Fund in collective investment schemes. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

Benchmark of the fund is BLOOMBERG Global Aggregate Total Return (hedged into GBP).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day by 12:00.

We reinvest the income into the fund.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Derivatives may be used to a large extent to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be

subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.43%
-----------------	-------

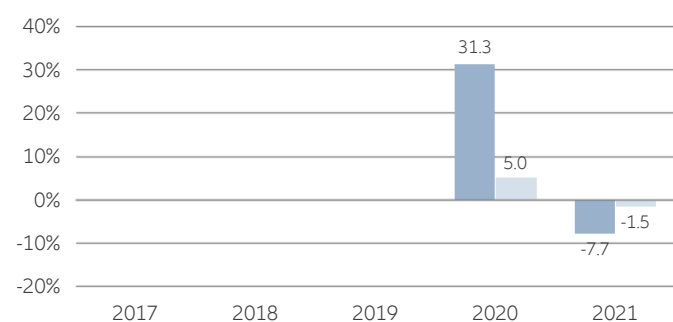

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 31.08.2021. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

■ Percentage growth of the fund
■ Benchmark: BLOOMBERG Global Aggregate Total Return (hedged into GBP)

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The fund was launched in 2002.

The performance of the fund is calculated in GBP.

Artemis UK Select Fund (the “fund”)

Class I accumulation units, GBP [ISIN: GB00B2PLJG05]

The fund is managed by Artemis Fund Managers Limited.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives:

- for investment purposes to achieve the fund objective, including by taking long and short positions
- to produce additional income or growth
- for efficient portfolio management purposes to reduce risk and manage the fund efficiently.

Where the fund invests

- United Kingdom, including companies in other countries that are headquartered or have a significant part of their activities in the United Kingdom.

Industries the fund invests in

- Any

Other limitations specific to this fund

- Total short exposures to equity derivatives will not exceed 10% of the fund.

Investment strategy

- The fund is actively managed.
- The manager generates ideas from a number of sources of information, detailed financial analysis and wider economic analysis. A systematic approach is used to collect, assess, and cross-reference this information.
- A company's valuation relative to the industry in which it operates is also considered.
- While considering factors which are unique to a company, the manager seeks companies whose valuations are overly conservative in relation to their peers and that provide attractive opportunities for a future upgrade.
- Short positions can be taken where stock-specific insight identifies an over-valued company.

Benchmarks

- **FTSE All-Share Index TR**
A widely-used indicator of the performance of the UK stockmarket, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.
- **IA UK All Companies NR**
A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

Other information

- **Dealing frequency:** Normally Monday to Friday except UK public holidays and non-dealing days. Visit www.artemisfunds.com/non-dealing-days for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.
- **Distribution policy:** This is an accumulation class. Income received is reinvested in the value of the fund.

RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- **Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
- **Charges from capital risk:** Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
- **Derivatives risk:** The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
- **Leverage risk:** The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

Artemis US Extended Alpha Fund (the “fund”)

Class I accumulation shares, GBP hedged [ISIN: GB00BYSZ0151]

A sub-fund of Artemis Investment Funds ICVC.

The fund is managed by Artemis Fund Managers Limited.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

There is no guarantee that the fund will achieve a positive return over a five-year period or any other time period and your capital is at risk.

Investment policy

What the fund invests in

- At least 80% in shares of US companies, either directly or indirectly through derivatives.
- Up to 20% in shares, or derivatives of shares, of companies in other countries, bonds, cash, near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.

Use of derivatives

The fund may use derivatives:

- for investment purposes to achieve the fund objective, including taking long and short positions
- to produce additional income or growth
- for efficient portfolio management purposes to reduce risk and manage the fund efficiently
- to create leverage.

Industries the fund invests in

- Any

Other limitations specific to this fund

- Total derivatives (longs plus shorts) are likely to represent a significant proportion of the fund's gross exposure to companies, which will typically lie in a range of +100% to +200% of net asset value.
- Net exposure (longs minus shorts) to companies will typically lie in the range of +85% to +110% depending on market conditions.
- A significant proportion of the fund will be held in cash due to the level of derivative use.
- To allow the fund to manage counterparty risk, it may also invest its cash in government bonds, generally of less than one year maturity.

Investment strategy

- The fund is actively managed.
- The manager uses multiple sources of information, both to generate ideas and to assist in validating and testing candidate companies for investment. This is complemented by techniques such as data mining (examining large databases of information) and financial analysis.
- External research is also used in order to tap into knowledge already available and to look for different views.
- The manager carries out a significant amount of analysis of wider economic trends is carried out in order to understand cyclical and long-term trends and the outlook.
- The manager derives alpha by seeking to exploit market inefficiencies by buying shares in companies believed to be undervalued and by shorting shares believed to be overvalued.

Benchmarks

- S&P 500 TR (hedged to GBP)
A widely-used indicator of the performance of 500 large publicly-traded US companies, some of which the fund invests in. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.
- IA North America NR
A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

Other information

- Hedging: The costs and benefits of currency hedging transactions will apply to hedged classes. This includes the costs of hedging and the allocation of any gains and losses resulting from the hedging transactions.
- Dealing frequency: Normally Monday to Friday except UK public holidays and non-dealing days. Visit www.artemisfunds.com/non-dealing-days for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.

Baillie Gifford Pacific Fund - Class B Shares

Accumulation Shares - ISIN GB0006063233 (also representative of Income Shares ISIN GB0006063340)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the MSCI AC Asia ex Japan Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Policy

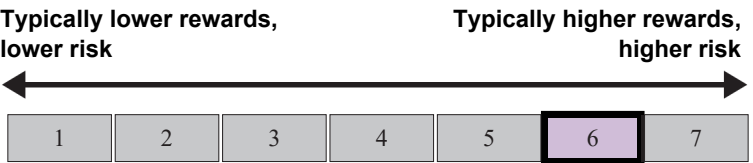

- The Fund will invest at least 90% directly or indirectly in shares of companies of any size and in any sector in Asia (excluding Japan) and Australasia.
- The Fund will invest in companies which are listed, incorporated, domiciled or conducting a significant portion of their business in Asia (excluding Japan) and Australasia.
- The indirect investment will be through collective investment schemes.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - The Fund invests in emerging markets where difficulties in trading and custody of assets could arise, impacting your investment. The Fund's investment in frontier markets may increase this risk.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

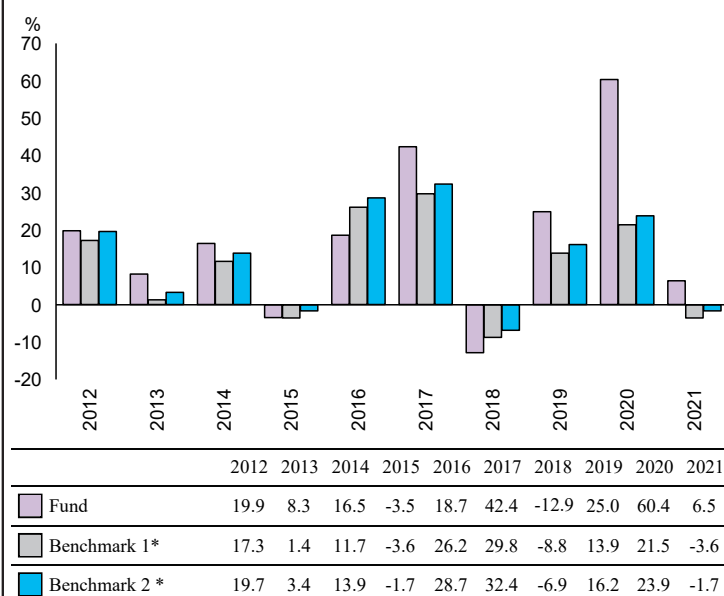

Ongoing charges	0.76%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Accumulation shares and is at 30/06/2022.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- The ongoing charges figure includes 0.05% of indirect fees. This may be higher than previous years as we now include indirect fees associated with closed-ended investment companies in the ongoing charges figure. It does not necessarily mean that fund expenses have gone up rather than a new way of showing them has been introduced through the Investment Association's Guidance on Disclosure of Fund Charges and Costs (July 2020, updated January 2022).
- You can find further details about the charges in Part 5 of the Prospectus.

The management company is Franklin Templeton Fund Management Limited.

Objectives and Investment Policy

The Fund's primary aim is to generate income. The Fund also seeks to grow in value by more than the OECD G7 Inflation Index + 5.5%, from a combination of income and investment growth, over five year rolling periods, before all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

The Fund invests at least 80% of the Fund's assets in a diverse range of shares of companies listed on the stock exchanges of developed countries. Such companies will operate across a variety of infrastructure sub-sectors, which may include gas, electricity, water, toll-roads, airports, rail and communication, anywhere in the world.

Up to 20% of the Fund's assets may be invested in shares of companies, including depository receipts (a type of listed security which enables investors to hold shares in foreign companies), issued by companies in emerging markets (countries whose economy and financial markets are still developing).

The Fund may also invest in recently issued shares of companies which are not yet listed but which are expected to be listed within 12 months of purchase.

The Fund can use derivatives for efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies). Up to 10% of the Fund may be invested in derivatives and recently issued securities.

The Fund usually invests in shares of around 30 – 60 companies, although the Investment Manager may invest in fewer or more companies where it considers this to be in the interests of the Fund.

While the Fund will normally be invested in accordance with the limits set out above, the Investment Manager has the freedom to invest outside of these limits, sometimes significantly, where the Investment Manager considers that, due to prevailing market conditions, it is in the interests of the Fund and its shareholders to do so.

In addition, the Fund may also invest a proportion of its portfolio in other transferable securities, cash and cash equivalents, money market instruments and other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates).

The Investment Manager selects securities based on their potential return and risk characteristics and role in achieving the Fund's investment objective. The portfolio is not constrained by any market index. The Investment Manager seeks to select infrastructure and utility companies which operate under a regulatory regime, or concession arrangement which provides the Investment Manager with a predictable cash flow and minimum

yield. In considering yield, the Investment Manager looks at the dividend yield, the dividend per share expectations over a five year period, and the relationship of a company's dividends and cash flows, over an estimated holding period. The Investment Manager has the freedom to choose securities that their research indicates have the strongest potential to meet the Fund's objective. The Investment Manager integrates financial and non-financial considerations in its assessment of a prospective investment. In selecting the Fund's investments, the Investment Manager assesses prospective investments against various environmental, social and governance ("ESG") factors, depending on the sector of the investee company, for example:

- Environmental factors, such as a company's environmental practices, greenhouse gas emissions and energy efficiency initiatives.
- Social factors such as a company's approach to community relations, occupational health and safety and reliability and pricing of services.
- Governance factors such as the governance structure of the company, management incentives and the Fund's alignment with management, board and other shareholders of the company.

These ESG factors are used to inform the Investment Manager's wider assessment of the value and financial attractiveness of each potential investment and exposures are adjusted accordingly. In addition, the Investment Manager assesses an investment's ESG credentials both at the point of proposed investment and in terms of projected credentials in 5 years' time, allowing the Investment Manager to identify investments which are expected to improve ESG credentials over time. The Investment Manager also uses the results of these assessments to inform its strategy for engagement with companies included in the portfolio.

The Fund will not invest in:

- Companies that derive a significant amount of their revenues (10% or more) from the extraction or production of fossil fuels.
- Companies involved in the production, sale or distribution of dedicated and key components of anti-personnel mines and cluster munitions.
- Companies in the following non-infrastructure sectors: mining, explosives, alcohol and gambling.
- Companies that generate more than 5% of their revenues from tobacco.

You may request the sale of your shares in the Fund on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Shares of companies (equities): Securities that represent an ownership stake in a company.

Transferable securities: investments such as shares or debt that can be bought and sold between investors.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely

affect the value of the equities regardless of company-specific performance.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Goldman Sachs India Equity Portfolio (the “Portfolio”)

Class I Shares (GBP)

(ISIN: LU1268608111)

a sub-fund of Goldman Sachs Funds (the “Fund”)

The Portfolio is managed by Goldman Sachs Asset Management Fund Services Limited (the “Manager”), part of Goldman Sachs group of companies.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The Portfolio seeks to provide capital growth over the longer term.
- The Portfolio will mostly hold shares or similar instruments relating to Indian companies. Such companies are either based in or earn most of their profits or revenues from India. The Portfolio may also invest in companies which are based anywhere in the world.
- The Portfolio will not invest more than one-third of its assets in bonds issued by corporate or government entities, convertibles (securities that can be converted into other types of securities), money market instruments and non-share related instruments.
- The Portfolio may use derivatives for efficient portfolio management purposes, to help manage risks and for investment purposes in order to seek to increase return. A derivative instrument is a contract between two or more parties whose value depends on the rise and fall of other underlying assets.
- Shares in the Portfolio may be redeemed daily (on each business day) on demand.
- The Portfolio is actively managed and references the MSCI India IMI Index (Net TR) (GBP) (the “Benchmark”) for the purposes of setting discretionary internal risk thresholds which may reference deviations from the Benchmark.
- The Investment Adviser has full discretion over the composition of the assets in the Portfolio. While the Portfolio will generally hold assets that are components of the Benchmark, it can invest in such components in different proportions, and it can hold assets which are not components of the Benchmark. Therefore returns may deviate materially from the performance of the specified reference Benchmark.
- As part of its investment process, the Investment Adviser will implement a multi-strategy approach to ESG which may consist of the application of exclusionary screens and the integration of ESG factors alongside traditional factors.
- Income (net of expenses) is distributed on an annual basis.
- The Portfolio currency is USD. The share class currency is GBP.
- **For full investment objective and policy details see the Prospectus.**

Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 6 as it mostly invests in emerging market shares and similar instruments which typically experience higher levels of price fluctuations than those in developed markets.

The capital is not guaranteed.

Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.

- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled “Risk Considerations” and discuss with your professional advisers.**

Charges

The charges you pay are used to pay the cost of running the Portfolio, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken over a year	
Ongoing charges	0.98%
Charges taken under certain specific conditions	
Performance fee	none

Where applicable, the entry and exit charges shown are maximum figures and in some cases you might pay less - please contact your professional advisers for more information.

The ongoing charges figure is based on expenses for the year ending November 2021. This figure may vary from year to year. It excludes transaction costs (including taxes and brokerage commissions) and any borrowing costs, which are payable from the assets of the Portfolio and may impact returns on your investment, and performance fees (where applicable).

For more information about charges, please refer to the Fund's Prospectus, section entitled "Fees and Expenses" and the relevant supplement for the Portfolio.

Past Performance

The Portfolio was launched in March 2008. The share class was launched in August 2015.

Where applicable, past performance has been calculated in GBP and is expressed as a percentage change of the Portfolio's Net Asset Value at each year end (net of all fees). Where past performance is not shown there is insufficient data to provide a useful indication of past performance.

Please be aware that past performance is not indicative of future performance which may vary.

JPMorgan Fund ICVC

ISIN: GB00BL0DTQ40

JPM Emerging Markets Sustainable Equity Fund S - Net Accumulation

a Share Class of JPMorgan Fund ICVC – JPM Emerging Markets Sustainable Equity Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide capital growth over the long-term (5-10 years) by investing at least 80% of the Fund's assets in emerging market Sustainable Companies or companies that demonstrate improving sustainable characteristics. Sustainable Companies are those that the Investment Manager believes to have effective governance and superior management of environmental and social issues (sustainable characteristics).

INVESTMENT PROCESS

Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Uses a high conviction approach to finding the best investment ideas.
- Seeks to identify high quality companies with superior and sustainable growth potential.
- Integrates ESG aspects to identify companies with strong or improving sustainability characteristics.

Benchmark MSCI Emerging Markets Index (Net)

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

POLICIES

Main investment exposure At least 80% of assets invested in equities of Sustainable Companies or companies that demonstrate improving sustainable characteristics and that are domiciled, or carrying out the main part of their economic activity, in an emerging market country. The Fund will focus on Sustainable Companies rather than companies demonstrating improving sustainable characteristics (which are companies with a clear timeline for improvement and tangible and measurable ways to demonstrate that improvement). The remainder of assets may be invested in equities of companies considered less sustainable than those described above.

Sustainable Companies and companies that demonstrate improving sustainable characteristics are selected through the use of proprietary research and third party data. The sustainability assessment process has three steps: 1) the exclusionary framework, 2) the identification of sustainable companies, and 3) an assessment of the valuation of the company. Step 1: The Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms based criteria. The exclusion policy for the Fund is

available at www.jpmmorgan.co.uk/investor. In addition, the bottom 20% lowest scoring companies based on the Investment Manager’s proprietary ESG focused checklist are excluded from the investable universe. Step 2: The identification of sustainable companies is based on fundamental analysis of the company and ongoing engagement with companies to understand how they consider ESG issues and also to try and influence their behaviour and encourage best practice. Fundamental analysis is used to better understand sustainability risks and opportunities that may impact a company. This analysis is also an important driver behind active company engagement when seeking to positively influence business practices to improve sustainability.

A core part of this analysis is completing a detailed ESG focused checklist for each potential company with the primary goal of identifying the key risks associated with the company. This analysis is performed alongside research to understand the company’s growth prospects and the sustainability of its competitive position and an identification of the five key sustainability issues that are relevant for companies in that industry. Step 3: The annualized expected return for a company is evaluated through sources of return which may include earnings growth, dividends, change in valuation and currency.

If a company ceases to qualify as a Sustainable Company, the Investment Manager will engage with the company to determine the circumstances for ceasing to qualify. If the company can resolve the matter in the short-term it may continue to be held in the portfolio. However, if not the security will be sold.

The Fund may invest in smaller companies.

The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes.

Other investment exposures Cash and near cash on an ancillary basis.

Derivatives Used for: efficient portfolio management; hedging. Types: see Fund Derivative Usage table under [How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: none. Global exposure calculation method: commitment.

Currencies Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: typically unhedged.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmmorgan.co.uk/kiid-glossary.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 6 because its simulated Net Asset Value has shown high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

JPMorgan Fund II ICVC

ISIN: GB00BYMFGF73

JPM UK Equity Plus Fund S - Net Accumulation

a Share Class of JPMorgan Fund II ICVC – JPM UK Equity Plus Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To provide capital growth over the long-term (5-10 years) through exposure to UK companies by direct investments in securities of such companies and through the use of derivatives.

INVESTMENT PROCESS

Investment approach

- Uses a bottom-up stock selection process.
- Uses the full breadth of the eligible equity investment universe through a combination of fundamental research insights and quantitative analysis.
- Uses an active extension approach, buying securities considered attractive and selling short securities considered less attractive to improve potential returns without increasing the overall net exposure to the market.

Benchmark FTSE All-Share Index (Net)

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.
- Basis for [relative VAR](#) calculations.
- Performance fee calculation.

POLICIES

Main investment exposure At least 80% of assets invested, either directly or through derivatives, in equities of companies that are domiciled, or carrying out the main part of their economic activity, in the UK. Small capitalisation companies may also be held.

The Fund will normally hold long positions of approximately 130% of its net assets and short positions of approximately 30% of its net assets but may vary from these targets depending on market conditions.

Other investment exposures Cash and near cash on an ancillary basis.

Derivatives *Used for: investment purposes; efficient portfolio management; hedging. Types: see [Fund Derivative Usage](#) table under [How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: 70% expected, 180% maximum. Global exposure calculation method: Relative VAR. Expected level of leverage from derivatives: 85% indicative only. Leverage may significantly exceed this level from time to time.*

Currencies *Fund Base Currency: GBP. Currencies of asset denomination: typically GBP. Hedging approach: not applicable.*

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.jpmorgan.co.uk/kiid-glossary](#).

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 6 because its simulated Net Asset Value has shown high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Asset Management Series PLC - Jupiter Merian North American Equity Fund (IRL)

(the 'Fund'), a sub-fund of Jupiter Asset Management Series PLC

I GBP Hedged Acc (ISIN - IE00BYR8HP89)

The Manager is Jupiter Asset Management (Europe) Limited (the "Manager")

Objectives and Investment Policy

Objective: long-term capital growth by investing primarily in shares (i.e. equities) and similar investments of companies listed or located in the US and Canada.

Policy: in seeking to achieve its investment objective, the fund aims to deliver a return, net of fees, greater than that of the MSCI North America Index with net dividends re-invested over rolling 3 year periods. The Fund will invest at least 70% in US and Canadian company shares and similar investments. The Fund may invest up to 15% in REITs (Real Estate Investment Trusts).

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

The Fund is actively managed. Portfolio construction is driven by systematic analysis of companies against several distinct characteristics including stock price valuation, balance sheet quality, growth characteristics, efficient use of capital, analyst sentiment and supportive market trends to identify attractively priced investment opportunities.

The Index is a representation of the markets in which the Fund primarily invests. Although a large proportion of the Fund's investments may be components of the Index, the Fund has the ability to deviate significantly from the Index.

Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on business days (excluding Saturdays, Sundays

and public holidays) where retail banks are open for business in Dublin and London and the New York Stock Exchange is open for business in New York.

Hedging policy: The Fund also aims to protect against exchange rate movements between the Fund's base currency and the share class currency by hedging.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

- Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.
- Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
- Geographic concentration risk** - a fall in the US and Canadian markets may have a significant impact on the value of the Fund because it primarily invests in these markets.
- Company shares (i.e. equities) risk** - the value of Company shares and similar investments may go down as well as up in response to the performance of individual companies and can be affected by daily stock market movements and general market conditions.
- REITs risk** - REITs are investment vehicles that invest in real estate, which are subject to risks associated with direct property ownership.
- Currency risk** - the Fund is denominated in USD. This share class is denominated in GBP. The hedging process may not give a precise hedge. In addition, where the Fund holds assets denominated in currencies other than USD, the value of your shares may rise and fall as a result of the exchange rate movements.

- Derivative risk** - the Fund uses derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge	None

-----------------	------

- These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.
- The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.
- The ongoing charges figure is based on the expenses of the Fund for the 12 month period ended December 2021. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- It is not the intention for a switching charge (2.50%) to apply but the Fund reserves the right to impose a switching charge in the future.
- You can find out more details about the charges by looking at the *Fees and Expenses* section of the prospectus.

Past Performance

- Past performance is not a guide to future performance.
- The Fund launched on 17 April 2002. This class started to issue shares on 16 August 2016.
- The value of the class is calculated in GBP. No index is available to provide a useful performance comparison for this hedged share class.
- The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

Practical Information

- The Fund's assets are held with its depositary, Citi Depositary Services Ireland Designated Activity Company.
- Jupiter Merian North American Equity Fund (IRL) is a sub-fund of Jupiter Asset Management Series Plc (the "Company"). The assets of this sub-fund are segregated from other sub-funds in the Company.

Man GLG Continental European Growth Fund Professional Accumulation Sterling Hedged Shares (Class CH)

(ISIN:GB00BYNRH370) Man GLG Continental European Growth Fund (the 'Fund') is a sub-fund of Man International ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to outperform the FTSE World Europe ex UK index (GBP, GDTR) over rolling 5 year periods from an actively managed portfolio (meaning the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective).
- The Fund invests, directly or indirectly, at least 80% of its assets in the listed securities of companies listed on European stock exchanges (excluding UK companies). In addition, the Fund may also invest in money market securities (securities used by governments, companies and others who wish to borrow money for short periods, usually less than a year), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares (shares that entitle the holder to a fixed-rate dividend, paid before any dividend is distributed to holders of ordinary shares) and other fixed income investments (some of which may be issued by an international agency).
- The Investment Adviser selects investments from an initial universe of over 1,500 companies based in Continental Europe, each of which will typically have a market capitalisation of above €500 million. From this universe, a list of around 150 potential investments which loosely meet the Fund's investment approach is created. The criteria for the Fund's investment approach consists of an analysis of a company's competitive position in the market and other financial criteria on the expectation that most such selected stocks can provide an annualised net return of 10% in normal market conditions.
- The Fund is actively managed, however the Investment Adviser uses the MSCI Europe ex UK Index (GBP, NDTR) as a guide in selecting assets for the Fund. Further, the ACD intends that the Fund will fall within the Investment Association's Europe excluding UK sector and the Investment Adviser may therefore make investment decisions for the Fund and select assets for investment based on the requirements applicable to funds classified in this sector. As at the date of this Prospectus, the requirements of the sector include the condition that funds falling within the sector must invest at least 80% of their assets in European equities and exclude UK securities, subject to the exception that up to 5% of the total assets of such funds can be invested in UK equities.
- The Fund is expected to hold a small number securities/holdings (typically between 25 to 35). No more than 20% of the Fund will be invested in equities of companies with a market capitalisation of lower than USD 1 billion at the time of purchase.
- The Fund may alter the investment exposure created by these securities through the use of currency transactions.
- Use financial derivative instruments ("FDI").* The Fund may use FDI (instruments whose prices are dependent on one or more underlying assets) to achieve the investment objective and for efficient portfolio management to hedge (a technique using investments to reduce risk) against anticipated movements in a market, security or currency. Securities will either be denominated in GBP or hedged into GBP if denominated in another currency via currency hedging to minimise the effect of exchange rate fluctuations. Currency hedging techniques include entering into currency forward contracts.
- Benchmarks.* The Fund is managed with reference to benchmarks. The Fund's performance target (to outperform the FTSE World Europe ex UK index (GBP, GDTR) over rolling 5 year periods) has been chosen by ACD as a reasonable performance target for the Fund to achieve, taking into account a number of factors including: (i) the investment strategy pursued by the Investment Adviser and (ii) the assets in which the Fund will principally invest. Further, the MSCI Europe ex UK index (GBP, NDTR) and the Investment Association's Europe excluding UK sector are used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in Fund).
- Dealing.* Shares can be bought and sold on each Dealing Day, as detailed in the Fund prospectus.
- Investment Horizon.* This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Responsible investing.* The Investment Adviser may seek to incorporate non-financial factors and sustainability themes in the investment decision-making process. This may lead the Investment Adviser to exclude particular assets, and to apply environmental, social and governance ('ESG') factor screening.
- Treatment of income.* Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded

the same protections that may apply to participants trading instruments on an organised exchange.

- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate.
- A limited number of investments may be held which can increase the volatility of performance.
- The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.
- The Fund is a specialist geographic regional fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The currency hedging used for this share class to minimise the effect of certain exchange rate fluctuations may not be completely successful.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 31/05/2022.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2004. This share class was launched on 12 October 2015.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- NDTR: Net Dividend Total Return Benchmark which reflects the value of price movements as well as reinvested dividends net of the appropriate country withholding tax.
- The Fund is not an index-tracker and does not seek to track the benchmarks shown in the past performance chart. The benchmark MSCI Europe Ex UK (GBP,NDTR) is the lead share class benchmark. Man GLG High Yield Opportunities Fund Professional Income Shares (Class D)

(ISIN:GB00BJK3W271) Man GLG High Yield Opportunities Fund (the 'Fund') is a sub-fund of Man Fixed Interest ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to provide income and capital growth by investing mainly in sub-investment grade bonds (debt securities of issuers that are considered to have a higher risk of failing to make interest payments or repay the initial amount borrowed than "investment grade" issuers, who are considered to carry a low to medium risk).
- The debt securities in which the Fund may invest include those issued by corporate bodies, and those issued or guaranteed by governments or supranational bodies. The Fund may also invest in other transferable securities (such as shares), money market instruments (investments usually issued by banks or governments that are a short term loan), deposits, cash or cash equivalents and other funds (which may include those managed by the ACD or its associates). The Fund may hold a significant portion (or all) of its value in cash and/or liquid assets where it is believed to be in the interests of the Fund and its investors. The Fund will invest at least 80% of its assets in securities rated below investment grade by Standard & Poor's (i.e. below BBB minus) or Moody's (i.e. below Baa3) or an equivalent external rating agency under normal market conditions. The Fund may invest up to 30% of its assets in securities that provide exposure to emerging markets (developing countries). The Fund may invest in or hold distressed, stressed and special situations credit investments (being investments, the issuers of which, are subject to events impacting on their current valuations). Such investments may be in the form of debt instruments or certain credit-related equities.
- The Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective, however, the Investment Adviser may use the ICE BofA Global High Yield Index as a guide in selecting assets for the Fund. The Fund principally uses a bottom-up approach to select assets (i.e. focusing on analysing individual investments, rather than markets), and will consider a number of factors, mainly using the issuer's financial statements, for example, leverage (indebtedness), cash-flow and earnings.
- The Fund may pursue a 'long-short strategy', which means that, in addition to buying and holding assets with the expectation that they will rise in value, it may take positions against issuers which are viewed as overvalued or expected to fall in value ('short' positions).
- Use of financial derivative instruments ("FDI")*. The Fund may use FDI (instruments whose prices are dependent on one or more underlying assets) to take 'short' positions in order to achieve the investment objective and for efficient portfolio management to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- Benchmarks*. The Fund is managed with reference to benchmarks. The ICE BofA Global High Yield Index, is considered to constrain the assets in which the Fund may invest and is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- Dealing*. Shares can be bought and sold on each Business Day, as detailed in the Fund prospectus.
- Investment Horizon*. This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.
- Treatment of income*. Income earned on investments will be distributed to investors as an income payment.

Risk and reward profile

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 4 as funds of this nature engage in strategies that typically have a moderate volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- The Fund may invest a significant proportion of its assets in non-investment grade securities (such as "high yield" securities) which are considered higher risk investments that may cause income and principal losses for the Fund. They are instruments which credit agencies have given a rating which indicates a higher risk of default. The market values for high yield bonds and other instruments tend to be volatile and they are less liquid than investment grade securities.

- The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.
 - The fund may make investments or hold trading positions in markets that are volatile and which may become illiquid.
 - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments and 'over-the-counter' ("OTC", "non-exchange") transactions.
 - OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
 - The Fund's use of FDI may result in increased leverage which may lead to significant losses.
 - Whilst the Fund aims to provide capital growth over 3 years this is not guaranteed.
 - The Fund may invest in contingent convertible ("coco") bonds. The performance of such bonds is dependent on a number of factors including interest rates, credit and equity performance, and the correlations between factors. As such these securities introduce significant additional risk to an investment in the Fund.
 - The Fund will invest financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.
 - There is no guarantee that the Fund will achieve its investment objective.
- A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.75%
-----------------	-------

Charges taken from the fund under certain specific conditions

MI Chelverton UK Equity Growth Fund ("the Fund") B Accumulation Shares

This is a sub fund of MI Chelverton Equity Fund. The Fund is an Open Ended Investment Company. ISIN: GB00BP855B75. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to provide long term capital growth.

The Fund will invest in UK small and medium sized market capitalised companies that aim to provide capital growth. These shares will either be fully listed on the London Stock Exchange or listed on AIM (The London Stock Exchange's international market for smaller, growing companies).

The Fund may also invest in money market instruments and cash deposits.

Any income this share class generates will be reinvested to grow the value of your investment.

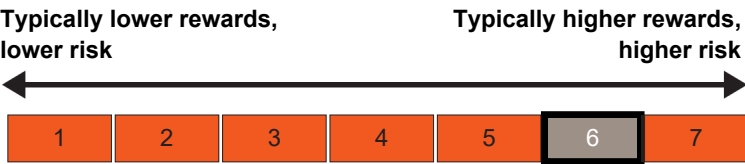

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Smaller company shares can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share price may fluctuate more than that of a larger company.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- The level of targeted income is not guaranteed and may not be achieved.
- For further risk information please see the prospectus.

Global Strategic Equity Fund

A sub-fund of Ninety One Fund Series ii
managed by Ninety One Fund Managers UK Limited

Class I Accumulation shares portfolio hedged (AC) in
sterling
ISIN: GBOBDGV6C12

Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of companies around the world and in related derivatives (financial contracts whose value is linked to the price of the shares of such companies).

The Fund focuses on investing in companies expected to become more profitable due to operational and/or structural improvements.

Investment opportunities are identified using in-depth analysis and research on individual companies.

These companies may be of any size and in any industry sector.

The Fund may also invests in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used for investment purposes (i.e. in order to achieve the Fund's investment objectives) or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Investment Manager uses a currency hedging strategy (an investment technique which aims to protect the value of an investment against currency movements) that looks-through to the portfolio's investments and aims to reduce exchange rate risk for investments priced in currencies other than the currency of the share class.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The MSCI AC World Net Return Hedged GBP Index is used for performance comparison and risk management. The Fund does not seek to replicate the index.

The Investment Association Global Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk
Potentially lower rewards

Higher risk
Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market: These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Portfolio Currency Hedging: Portfolio currency hedging aims to protect investors from a decline in the value of the primary currencies of the underlying investments, and investors may not benefit from an increase in the value of those currencies against the value of the share class currency. Where the underlying investments are denominated in currencies where the hedging costs are higher, for instance in emerging market currencies, the hedged returns can be significantly lower than the local currency returns. There can be no assurance that hedging strategies will be successful and such hedging can positively or negatively impact investors by inaccuracies in the operation of the hedge.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2021. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

Global Dynamic Bond Fund

a sub fund of Nomura Funds Ireland plc
Class RD GBP Hedged (IE00BWX08Z75)
Bridge Fund Management Limited is the Management Company of the Fund.

Objectives and investment policy

To achieve income and capital growth by investing primarily in a globally diversified portfolio of bonds (which are like loans that can pay a fixed or variable rate of interest).

The bonds are issued mainly by companies, governments and other financial institutions from around the world. Up to 30% of the Fund may be invested in bonds of emerging market issuers. The Investment Manager has full discretion when deciding which investments should be held in the Fund but will primarily buy bonds that have been rated by at least one rating agency (Standard & Poors or Moody’s). The Fund may purchase up to 30% of its Net Asset Value in unrated securities (which are not rated by a rating agency) if the Investment Manager determines that the security is of comparable quality to a rated security that the Fund may purchase.

The Fund may use derivatives for investment purposes (such as trying to achieve higher returns) or to manage the effect of changes in interest rates and reduce some of the market risks. Derivatives are linked to the rise and fall of other assets. In other words, they derive their price from another asset. They can generate returns when share prices and/or indices fall.

Any income generated by the Fund will be paid to you or can be reinvested in additional shares to grow the value of your investment.

You can buy and sell shares in the Fund on any working day in Dublin, London and New York.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

Typically lower rewards,

Typically higher rewards,

- The Fund is classified in the category above because of the past behaviour of funds of this type. Where no share price history is available for any part of the last five years, the history of an appropriate benchmark or share class has been used in its place.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases and that the fund is not guaranteed to always stay in the same category.
- The indicator does not take into account the following material risks of investing in this Fund:
 - Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts.
 - This fund may hold bonds that are issued by companies and governments. It can also hold bonds that are traded through brokers or investment banks matching buyers and sellers, which may be less easy to buy and sell in times of market uncertainty. If this happens, the value of your fund may fall and in extreme circumstances redemptions from the fund may be delayed.
 - The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
 - Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment. ‘Hedging’ aims to deliver a return that is as close as possible to the base currency of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, these techniques may not be fully effective.
 - A full list of risks that may be applicable to this Fund can be found in the Prospectus.

Rathbone Strategic Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B6ZS2486

Income units ISIN: GB00B6ZS1L87

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Strategic Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Strategic Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We aim to deliver this return with a lower volatility than the IA Sterling Strategic Bond sector. As an indication, the value of our fund should be expected to fluctuate less than the sector. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking compared to funds similar to ours.

We will invest in a mixture of government and corporate bonds, with no restriction on their credit quality. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. We also use a mixture of specialist funds and direct investment in bonds, with no limits on either. We do, however, have restrictions on how much of our fund can be invested in different types of bonds. These limits are reviewed annually or in response to changes in the market.

Bond types	Min	Base	Max
Government bonds (AAA-C)	5%	50%	90%
UK government bonds	2.5%	12.5%	22.5%
UK inflation-linked government bonds	2.5%	12.5%	22.5%
Global developed government bonds excluding UK	0%	10%	20%
Global emerging government bonds	0%	15%	25%
Investment grade corporate bonds (AAA to BBB-)	0%	35%	55%
UK corporate bonds	15%	25%	35%
Global corporate bonds	0%	10%	20%
High yield corporate bonds (BB+ to C)	0%	15%	35%
Global high yield bonds	5%	15%	25%
Distressed debt	0%	0%	10%

During extreme market conditions we may invest solely in UK government bonds to protect your investment.

At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, bonds have greater risk than money market instruments, but less risk than shares.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling and can, from time to time, protect some or all of them using hedging techniques. While we're hedged, changes in the price of foreign currencies can result in you missing out on a potential gain, but also protects you from potential losses.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Key Investor Information

Vanguard Emerging Markets Bond Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

Investor "GBP" Hedged Accumulation Shares ISIN: IE00BKLWXP06

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund seeks to provide total return while generating a moderate level of income by investing primarily in bonds of issuers in emerging market countries.
- The Fund employs an "active management" strategy, aiming to outperform the J.P. Morgan EMBI Global Diversified Index (the "Index"), over the cycle, and in doing so, the Investment Manager will follow distinct approaches in managing the Fund's assets.
- The Fund invests in fixed income securities of various maturities, yields, and qualities. Under normal circumstances, the Fund will invest at least 80% of its assets in fixed income securities of issuers that are tied economically to emerging market countries. The Fund seeks to have a majority of its assets denominated in or hedged back to the U.S. dollar but has the ability to invest in bonds denominated in a local currency on an unhedged basis. Emerging market bonds include sovereign debt securities, which include fixed income securities that are issued or guaranteed by foreign governments or their agencies, authorities, political subdivisions or instrumentalities, or other supranational agencies, as well as debt securities issued or guaranteed by foreign corporations and foreign financial institutions.
- The Fund may take active fixed income sector and security selection views with the focus on outperforming the Index. The Investment Manager may apply constraints which limit the potential volatility of the Fund relative to the Index and such constraints may change or be removed from time to time at the Investment Manager's discretion and depending on market environments.
- The Investment Manager may in its discretion restrict the extent to which the Fund's risk factors deviate from the Index.
- The Fund may use derivatives, including for investment purposes, in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the

"Past performance" section below, the performance of this share class is shown against the J.P. Morgan EMBI Global Diversified Index Hedged in GBP (the "Hedged Index"), which is a currency hedged version of the Index.

- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&dclid=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc Prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers

to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Call risk. During periods of falling interest rates, issuers of callable bonds may call (repay) securities with higher coupons or interest rates before their maturity dates.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.60%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor.

Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2021. This figure may vary from year to year. It excludes portfolio transaction costs.

Vanguard Euro Government Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Acc
ISIN: IE00BFRTD722

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Euro Government Float Adjusted Bond Index (the "Index").
- The Index includes investment grade euro-denominated euro zone government bonds as well as government-related bonds with maturities greater than one year. The euro zone is all countries in the European Union that have adopted the euro as their currency.
- The Fund attempts to:
 - Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is EUR.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the "Past performance" section below, the performance of this share class is shown against the Bloomberg Euro Government Float Adjusted Bond Index Hedged in GBP (the "Hedged Index"), which is a currency hedged version of the Index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however,

expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
