Alquity Asia Fund, GBP Y Class Institutional/Reporting Shares (LU1070051708)

a sub-fund of Alquity SICAV

Management Company: East Capital Asset Management S.A.

Objectives and investment policy

Objectives

The sub-fund aims to achieve long-term capital appreciation for investors, by investing in Asian securities.

Investment policy

The sub-fund will invest at least two-thirds of its net assets in equity securities listed on the regulated exchanges of Asia (the Asian region).

The sub-fund may also invest in equity securities listed on regulated exchanges outside of the Asian region where more than 50% of revenue, income or operating profit is realised in the Asian region, or will be reasonably expected to do so in the near future.

The sub-fund will primarily focus on companies that will benefit from the long-term growth opportunities in the Asian region. This will include investing in frontier markets, small and mid-cap companies, as well as large-cap companies where the investment manager identifies unrecognised investment opportunities.

The sub-fund will mainly invest, directly or indirectly, in equities.

The sub-fund may also invest in assets such as bonds, Money Market instruments, time deposits, derivatives instruments etc.

The sub-fund may, on an ancillary basis, hold cash and equivalents.

The sub-fund is unconstrained, with a thematic process that incorporates ESG (environmental, social, governance) and impact analysis. The ESG analysis eliminates over 20% of potential stocks that have passed our thematic filter. Furthermore, in order to meet our desired portfolio characteristics and tracking error, we may optimise the portfolio with reference to a relevant index. It is our intention that the investments contained within the sub-fund will collectively emit lower GHG and use less water than the relevant index.

The sub-fund is actively managed without reference to a benchmark.

The reference currency of the sub-fund is expressed in USD.

The currency of the share class is expressed in GBP.

The investor may subscribe and redeem shares on each bank business day in Luxembourg.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 3-5 years.

Risk and reward profile

The category 6 means a high risk and consequently high potential losses and gains.

The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.

The lowest category of the risk indicator does not mean a risk-free investment. Repayment of the initial investment is not guaranteed.

- **Currency risk:** the fund may have holdings which are denominated in different currencies and may be affected by movements in exchange rates. Consequently, the value of the Fund's investments and the income from them may rise or fall in line with exchange rates.
- **Emerging and Frontier markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.
- **Derivatives:** this fund can use derivatives in order to meet its investment objective. The use of derivatives may result in greater fluctuations in the value of the Fund, and may increase the magnitude of any losses.

- **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.
- **Operational risk:** the risk of losses resulting from errors or failures arising from the people, systems, service providers or processes upon which the Fund depends.
- **Legal or Tax risk:** arising from a change in legal regulations, tax rules of the application of them.
- **ESG risk:** the security selection made in accordance with such criteria can involve a significant element of subjectivity. ESG factors incorporated in the investment processes may vary depending on the investment themes, asset classes, investment philosophy and subjective use of different ESG indicators governing the portfolio construction or its underlying investments. Accordingly, there is no assurance all investments of a given sub-fund meet all ESG criteria. The investment process for the fund encompasses the consideration of environmental, social and governance (esg) factors to ensure that investments made by the fund contribute to long term sustainable economic growth and progress towards the UN Sustainable Development Goals. This consideration of ESG issues eliminates a minimum of 20% of the stocks from the fund's initial universe. The ESG performance of holdings is monitored as a part of the investment process to ensure they remain aligned with these objectives.

For further information concerning the risks of the sub-fund, please consult the prospectus of the fund, which is available at the registered office of the Management Company and on www.alquity.com.

Charges

The charges you pay are used for the operation of the sub-fund, including charges for its marketing and distribution. These charges reduce the potential investment growth.

One-off charges taken before or after you invest	
Entry charge	Up to 5%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1.55%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown correspond to a maximum percentage which might be deducted from the investor's capital invested into the fund. In some cases, the investor might pay less. The investor may contact his financial adviser or intermediary to be informed on the actual entry and exit charges.

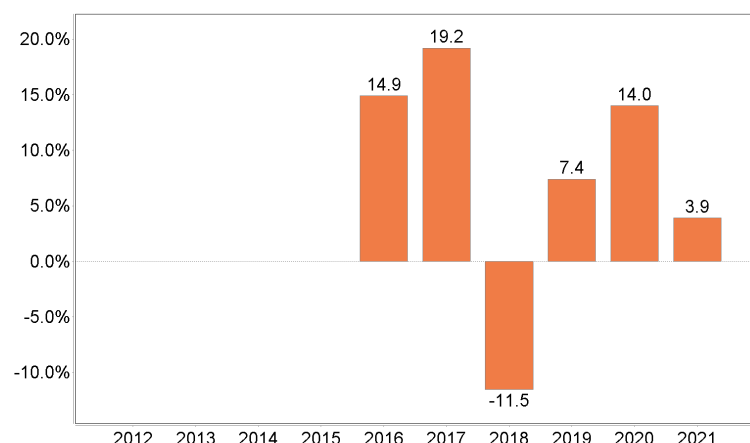

The ongoing charges relate to all annual charges; they were calculated on 31.12.2021. The ongoing charges may vary from year to year.

The figure of the ongoing charges excludes:

- Securities transaction charges, except for the charges related to the purchase and the sale of target funds.

For further information concerning charges, please consult the heading "Charges and expenses" of the fund's prospectus, which is available at the registered office of the Management Company and on www.alquity.com.

Past performance

All charges and fees, except for the entry and exit charges, were taken into account.

The past performance was calculated in GBP.

Past performance is not a reliable indicator of future performance.

The sub-fund was created in 2014.

This share class was created in 2015.

BlackRock Sustainable Sterling Strategic Bond Fund

A sub-fund of BlackRock Investment Funds

Class Z Accumulating GBP

ISIN: GB00BZ6DDZ33

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase to the value of the Fund's assets and/or income received from those assets) of 4.5% per year (gross of fees) over the return of the 3-month Sterling Overnight Index Average in a manner consistent with the principles of sustainable investment.
- ▶ The Fund invests at least 80% of its total assets in fixed income (FI) securities (such as bonds) globally, and instruments related to such FI securities (i.e. other investments whose value is related to debt) and at least 50% of its total assets in Sterling denominated non-government FI securities that are investment grade (i.e. meet a specified level of creditworthiness) at the time of purchase and instruments related to such FI securities. However, the Fund will invest in the full range of FI securities which may include investments with a relatively low credit rating or which are unrated. The FI securities may be issued by companies, governments, government agencies and supranationals (e.g. the International Bank for Reconstruction and Development).
- ▶ The Fund may also invest in equity securities (e.g. shares) of companies and in asset backed and mortgage backed securities (i.e. financial securities backed by cash flows from debt), money market instruments (i.e. debt securities with short-term maturities), deposits, cash and other funds.
- ▶ The Fund's investment manager (IM) expects to achieve, in respect only of the corporate issuers in which the Fund invests, a Fund carbon emission intensity score of 20% less than an equivalent portfolio of companies that does not apply any environment, social or governance (ESG) criteria as represented by the Bloomberg Global Aggregate Corporate Bond Index (Index). Securities issued by non-corporate issuers, such as government securities, are not included but may represent a material portion of the Fund's assets.
- ▶ The Fund applies the BlackRock EMEA Baseline Screens whereby the IM excludes direct investment in corporate issuers (only) which have certain levels of exposure to, or ties with, sectors including controversial weapons, nuclear weapons, civilian firearms, tar sands, thermal coal, tobacco and issuers deemed to have breached one or more of the UN Global Compact Principles (Screens). Further details regarding the Screens are available in the Fund's prospectus and at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>.
- ▶ The Fund uses a proprietary methodology to evaluate whether, in the IM's assessment, issuers and securities display positive sustainability characteristics (such as those with beneficial ESG impacts for third parties and/or considered best in class ESG performers) or negative sustainability characteristics (such as those with harmful ESG impacts for third parties and/or considered worst in class ESG performers). The IM then weights the Fund's portfolio towards the former and away from the latter. Where consistent with this weighting and the Screens, the Fund may continue to invest to a very limited extent in issuers and securities that display negative sustainability characteristics and may invest in those evaluated as not having positive or negative characteristics or whose characteristics are undetermined.
- ▶ The Fund may also invest directly in derivatives (investments the price of which is based on one or more underlying assets) for investment purposes and for efficient portfolio management purposes, including to reduce the effect of exchange rate fluctuations between any non-Sterling denominated assets and Sterling.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed. The IM has discretion to select the Fund's investments and is not constrained by any benchmark. 3-month SONIA should be used by unitholders to compare the performance of the Fund. The Fund's carbon emission intensity score is measured against the Index.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 25 January 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Practical Information

- The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com or by calling Investor Services on 0800 44 55 22.
- Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- The Fund is a sub-fund of BIF, an umbrella structure comprising different sub-funds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the Fund's prospectus, annual and half-yearly reports are prepared for the BIF umbrella.
- BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- Under UK law, BIF has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within BIF). In addition, the Fund's assets are held separately from the assets of other sub-funds.
- Investors may switch their units in the Fund for units in another sub-fund within BIF, subject to meeting certain conditions as set out in the prospectus.

BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Sustainable Global Equity Income Fund

F SHARES (ACCUMULATION) (ISIN: GB00BJ066Y68)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To achieve income together with the potential for capital growth over the long term (5 years or more).

POLICY

The Fund will:

- invest anywhere in the world;
- invest at least 75% of the portfolio in equities (company shares), including ordinary shares, preference shares and other equity-related securities;
- invest in companies of all sizes (e.g. small, medium and large companies) and in any industry (e.g. pharmaceuticals, financials); and
- typically invest in fewer than 70 companies that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria. The Investment Manager's sustainability criteria exclude companies that participate in certain activities and involve other general and company level ESG-related analysis of a company's activities.

The Fund may:

- invest in emerging markets;
- invest in money market instruments, deposits, cash and near cash;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective.

The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and

- invest up to 10% in other collective investment schemes (including but not limited to another Sub-Fund or Sub-Funds of the Company or other BNY Mellon funds).

Benchmark: The Fund will measure its performance against the FTSE World TR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because the Investment Manager utilises this when measuring the Fund's income yield.

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the investment weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Treatment of income: net income from investments will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is as agreed.

Risk and Reward Profile

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

1 2 3 4 **5** 6 7

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. As this Fund has less than five years performance data available, it is based on simulated volatility and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 5 because its simulated historical value has shown moderately high volatility. With a Fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.

- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Concentration Risk:** A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.
- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **Sustainable Funds Risk:** The Fund follows a sustainable investment approach, which may cause it to perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities. The Fund will not

engage in stock lending activities and, therefore, may forego any additional returns that may be produced through such activities.

- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- **Investment in Infrastructure Companies Risk:** The value of investments in Infrastructure Companies may be negatively

impacted by changes in the regulatory, economic or political environment in which they operate.

- **High Yield companies risk:** Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

KEY INVESTOR INFORMATION

EDENTREE RESPONSIBLE AND SUSTAINABLE

SHORT DATED BOND FUND

SHARE CLASS B GB00BZ012J01

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate director.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to preserve capital and generate a regular income payable quarterly.

The EdenTree Responsible and Sustainable Short Dated Bond Fund seeks to invest at least 80% in short dated government bonds and debt instruments issued by companies that the manager believes make a positive contribution to society and the environment through sustainable and socially responsible practices.

In line with the Fund's objective to preserve capital, the Fund will aim to invest at least 80% in sterling denominated fixed interest securities of short duration. Portfolio duration will be expected to average around 2 years, with the anticipated upper limit being 3 years. The portfolio will also look to maintain high credit quality. Securities will usually have a minimum credit rating of A by Moody's, S&P and or Fitch to be considered for investment. A maximum of 10% of the holdings may be invested in BBB-rated debt, seeking a target overall portfolio rating of A or better.

The Manager may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, term deposits, nil and partly-paid securities, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions. We assess a diverse set of indicators of a company's approach to sustainability during our screening process. Further details of EdenTree's Responsible and Sustainable Investment Policy are available on request or can be downloaded from our website at www.edentreeim.com.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

Further details of EdenTree's Responsible and Sustainable Investment Policy which are available on request or can be downloaded from our website at www.edentreeim.com.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

This Fund is marketable to retail investors and will be managed in line with the requirements for inclusion in an Individual Savings Account (ISA) but is not available for direct investment in our stocks and shares ISA.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 2 as its price has experienced nominal rises and falls historically based on simulated data.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- The issuer of a financial security held within the Fund may not pay income or repay capital to the Fund when due. The value of a security may be affected by the general state of the economy and market perception of the risk of default.

More details on all of the risks mentioned above can be found in the full Prospectus.

Federated Hermes SDG Engagement High Yield Credit Fund (the “Fund”)

a sub-fund of Federated Hermes Investment Funds plc (the “Company”)

Class F Stg£ Acc. Hedged Shares (ISIN: IE00BK0X9Q74)

Hermes Fund Managers Ireland Limited (the “Manager”)

Objectives and investment policy

The investment objective of the Fund is to provide total return, through a combination of income and capital growth over a rolling period of any five years, whilst delivering positive societal impact aligned to the United Nations Sustainable Development Goals (“UN SDGs”).

However, there is no guarantee that this will be achieved and your capital is at risk.

The Fund is actively managed and will seek to achieve its objective by investing at least 80% in a diversified portfolio of Below Investment Grade debt securities (these include bonds, CDS and secured loans) on a global basis. Some of these may be Unrated.

On occasion it may also invest in other financial instruments, for example other funds and rated or Unrated Bonds and Derivatives. The Investment Manager will consider how well companies manage environmental, social and governance (“ESG”) factors. The companies will either have strong or improving ESG characteristics. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%.

The Fund uses Derivatives to assist in achieving its investment objective; Derivatives may increase or reduce exposure to underlying assets and create leverage.

The Fund may borrow on a limited basis (up to a maximum of 100% of the value of the Fund). Leverage is not part of the investment strategy of the Fund.

The Fund’s base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of those investments into USD.

The benchmark, for performance comparison purposes only, is the ICE BofA Global High Yield Constrained Index.

This Share Class will be hedged. Hedging seeks to minimise exposure to exchange rate differences between the Share Class currency and the base currency of the Fund (USD).

You may buy or sell shares in the Fund each business day (except bank holidays in the UK and Ireland).

This Share Class is accumulating. Your portion of any income received will be reinvested. This will be reflected in the value of your shares.

Useful definitions

- **Credit:** A Fixed Income debt investment (including ‘Bonds’) in which the Fund lends money to a government or company, who is then obliged to pay a specified amount back to the purchaser of the Bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Credit Default Swap (CDS):** A type of Derivative that aims to protect against the loss in value of a Bond. It can also be bought and sold for investment purposes.
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **High Yield/Below Investment Grade:** A Fixed Income debt investment (also known as a ‘Bond’ or ‘Credit’) which may have a high level of return (i.e. yield) and a corresponding higher level of risk than other Fixed Income debt instruments.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.
- **Unrated:** Unrated debt that has not been assessed by a recognised rating agency.
- **UN SDGs:** The Sustainable Development Goals are a collection of 17 global goals set by the United Nations General Assembly in 2015 for the year 2030.
- **ESG:** An acronym for ‘Environmental, Social and Governance’ characteristics. A company can be assessed on its management of these considerations.

Risk and reward profile

Narrative explanation of the indicator and its main limitations:

The value of investments and income from them may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean ‘risk free’.
- This reflects volatility of the Fund based on historic movements of underlying investments.

Particular risks not adequately captured by this indicator include:

- **Bonds Risk:** When the Fund invests in debt instruments (such as Bonds), there is a risk that the entity issuing the debt will not be able to repay its original capital or the interest due. Also, the value of the debt instrument may rise or fall as interest rates change.
- **Emerging Markets Risk:** The performance of the Fund may have some dependence on the economic environment of emerging markets, which has increased risk compared to developed markets.

- **Counterparty Risk:** If any institutions that provide custody of assets, deposits or counterparty services on financial derivatives for the Fund experience financial difficulties, the Fund may be exposed to financial loss.
- **Loan Risk:** The Fund may invest in secured loans. In the event of non-payments on a loan, the sale of assets from a secured loan may not match the return expected from the loan repayment.
- **Leverage Risk:** The use of leverage may result in large fluctuations in the net asset value of the Fund, amplifying either gains or losses.
- **Financial Derivative Instruments (“FDIs”) Risk:** The Fund uses Derivatives, the value of which depends on the performance of an underlying asset. Small changes in the price of that asset may cause larger changes in the value of the associated Derivatives, increasing potential gain or loss. Derivatives may increase or reduce the overall volatility of the Fund.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the last quoted market price.
- **Sustainability Risk:** The fund has the objective of sustainable investment and so may perform differently to other funds, as its exposures reflect its sustainability criteria.
- **Operational Risk:** The potential loss resulting from error or failure arising from people, systems, controls/safeguards or service providers that the Fund relies on.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the Fund over a year	
Ongoing charge	0.71%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The ongoing charges figure is based on expenses for the year ending 2021. The Company's report for each financial year will include detail on the exact charges made. This figure may vary with time. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.

Research costs are borne by Hermes Investment Management Limited.

For more information about charges, please see the Section entitled "Fees and Expenses" in the Fund's prospectus and supplement, each of which are available at www.hermes-investment.com.

iShares Green Bond Index Fund (IE)

A sub-fund of BlackRock Fixed Income Dublin Funds plc

Class D Accumulating GBP Hedged

ISIN: IE00BD5GZQ41

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income, which reflects the return of the Bloomberg MSCI Green Bond Index, the Fund's benchmark index (Index).
- ▶ The Fund invests predominantly in the fixed income (FI) securities (such as bonds) that make up the Index, the proceeds of which are used to fund projects with direct environmental benefits.
- ▶ It is intended that, at the time of purchase, the FI securities will have received a long term credit rating which complies with the credit rating requirements of the Index, being currently at least investment grade (i.e. meet a specified level of creditworthiness) from Moody's, Standard & Poor's or Fitch Ratings or are deemed, by the investment manager (IM), to be of an equivalent rating. If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position, in a manner that is in accordance with the requirements of the Index or in the best interests of the Fund.
- ▶ The Index measures the performance of multi-currency denominated, fixed rate, investment grade FI securities issued by corporate and government-related issuers and entities in the securitised sector on a global basis, including emerging markets. To be classified as a green bond for the purpose of the Index and to qualify as providing a direct environmental benefit, a bond's proceeds must fund projects that fall within one or more qualifying environmental categories (as determined by the Index provider) including, but not limited to, alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation. General purpose bonds are also eligible if 90% of the issuer's activities (as measured by revenues) fall within one or more of the foregoing categories. The Index has no duration target, either as a measure of the average time it takes for a return (both capital and income) to be achieved on the investments held or as a measure of the sensitivity of bond prices to movements in interest rates. For more details, please refer to the Prospectus.
- ▶ The Fund uses techniques for efficient portfolio management purposes or to protect against exchange rate risk or to achieve a similar return to the Index. These techniques may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. They may also include the use of financial derivative instruments (FDI) (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes to securities with exposures which may not satisfy green bond requirements of the Index.
- ▶ The IM intends to exclude direct investment in issuers of securities which are engaged in or are otherwise exposed to the production of controversial weapons (including but not limited to cluster munitions, biological-chemical, landmines, depleted uranium, blinding laser or incendiary weapons); or derive any revenue from the direct involvement in the production of nuclear weapons or components or related services.
- ▶ The Fund is passively managed. The IM has limited discretion to select the Fund's investments and in doing so will take into consideration the Index.
- ▶ The Fund will adopt a thematic approach to sustainable investing, this means that it is expected that by investing in a portfolio of securities that as far as possible and practicable consists of the component securities of the Index, it is expected that the Fund will invest in securities linked to a specific theme, in this instance green bonds.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is Euro. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund's underlying portfolio currencies. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is £500,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.20%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2017. The share class was launched in 2018.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

JPMorgan Fund ICVC	ISIN: GB00B235HP90
JPM Europe (ex-UK) Sustainable Equity Fund C - Net Accumulation a Share Class of JPMorgan Fund ICVC – JPM Europe (ex-UK) Sustainable Equity Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited	

Objectives, Process and Policies

INVESTMENT OBJECTIVE

The Fund aims to provide capital growth over the long- term (5-10 years) by investing at least 80% of the Fund's assets in the shares of European Sustainable Companies (excluding the UK) in any economic sector, or companies that demonstrate improving sustainable characteristics. Sustainable Companies are those that the Investment Manager believes to have effective governance and superior management of environmental and social issues (sustainable characteristics).

INVESTMENT PROCESS

Investment approach

- Uses a bottom-up stock selection process.
- Uses the full breadth of the eligible equity investment universe through a combination of fundamental research insights and quantitative analysis.
- Integrates ESG aspects to identify companies with strong or improving sustainability characteristics.

Benchmark FTSE All-World Developed Europe ex UK Index (Net)

Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund will bear some resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

POLICIES

Main investment exposure At least 80% of assets invested in equities of Sustainable Companies, or companies demonstrating improving sustainable characteristics, that are domiciled, or carrying out the main part of their economic activity, in a European country (excluding the UK). The Fund may invest in small capitalisation companies.

The Fund will focus on Sustainable Companies rather than companies that demonstrate improving sustainable characteristics (which are companies with a clear timeline for improvement and tangible and measurable ways to demonstrate that improvement identified during the sustainability assessment process). The Investment Manager identifies companies, that in its opinion meet the Fund's sustainable investment objective through a sustainability assessment process. The process has three steps: 1) the exclusionary framework, 2) the identification of stocks with attractive sustainability characteristics using a proprietary ESG framework and company engagement, and, 3) the assessment of a company's underlying fundamentals.

The Fund may also invest up to 20% of its assets in equities of companies that are considered less sustainable than those described above.

Step 1: The Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms-based criteria. The exclusion policy for the Fund is available at www.jpmmorgan.co.uk/investor. In addition the lowest scoring companies

on each individual pillar (E, S and G) are excluded from the investable universe and the lowest scoring companies of the remaining universe are also excluded. These exclusions are based on the Investment Manager's proprietary ESG score.

Step 2: The identification of Sustainable Companies, and companies demonstrating improving sustainable characteristics, is based on fundamental analysis and ongoing engagement with companies to understand how they consider ESG issues and also to try and influence their behaviour and encourage best practice. Fundamental analysis is used to better understand sustainability risks and opportunities that may impact a company. This analysis is also an important driver behind active company engagement when seeking to positively influence business practices to improve sustainability. Further information on stewardship and engagement with companies is available at www.jpmmorgan.co.uk/investor. A core part of this analysis is based on a proprietary ESG framework to assess each company's exposure to, and performance on, material sustainability issues. The framework comprises of:

- A quantitative score based on key ESG factors across sub-industries
- A fundamental score based on JPMAM research analysts' answers to a checklist questionnaire with E, S and G pillars.
- An ESG momentum score, to capture improvement or deterioration in a company's sustainability credentials. Each stock in the investable universe is ranked on each underlying pillar and is applied an overall ESG score.

Step 3: An analysis of the company's fundamental information uses both fundamental and quantitative research and seeks to understand the style characteristics of each company to identify whether it has attractive value, quality, and/or momentum characteristics.

If a company ceases to qualify as a Sustainable Company, the Investment Manager will engage with the company to determine the circumstances for ceasing to qualify. If the company can resolve the matter in the short-term it may continue to be held in the portfolio. However, if not the security will be sold.

Other investment exposures Cash and near cash on an ancillary basis. **Derivatives** Used for: efficient portfolio management; hedging. Types: see [Fund Derivative Usage](#) table under [How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: none. Global exposure calculation method: commitment.

Currencies Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: typically unhedged.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class will reinvest income. For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmmorgan.co.uk/kiid-glossary.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective. The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Jupiter Global Sustainable Equities Fund T-Class

T-Class Accumulation Units, ISIN: GB00BFWVP888

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide a return, net of fees, that is higher than that provided by the MSCI AC World Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies which offer the potential for growth and that meet the Fund's environmental, social and governance ("ESG") considerations based anywhere in the world. Up to 30% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy

The fund manager applies a disciplined process to identify shares of the highest quality companies which are leading the transition to a more sustainable world economy, in economic, environmental and social terms.

These companies demonstrate excellent fundamentals and clear growth characteristics, and are identified through embedding environmental, social and governance ("ESG") considerations. These ESG considerations may include, but are not limited to, environmental impact, healthcare, societal contribution and gender equality.

The fund manager will also take into consideration alignment to the UN Sustainable Development Goals and the transition to a low carbon economy.

The Fund will tend to invest in a carefully selected number of companies where the manager has the highest conviction.

Benchmarks

Target benchmark – MSCI AC World Index

The MSCI AC World Index is an industry standard index and is one of the leading representations of global stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes. The use of ESG criteria is designed to support better investment outcomes – as such a broad market benchmark is viewed as the best tool for measuring success.

Comparator benchmark - IA Global Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Global Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.71%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Legal & General Future World ESG UK Index Fund Class I Accumulation - ISIN: GB00BJH4XV95

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the performance of the Solactive L&G Enhanced ESG United Kingdom Index NTR, the "**Benchmark Index**" before fees and expenses are applied.
- Fund performance may differ from the Benchmark Index as the Fund's returns are after the deduction of charges. Returns will also be impacted by tracking error factors such as transaction costs and portfolio weightings differing from the Benchmark Index.
- The Fund replicates as closely as possible the constituents of the Benchmark Index by investing at least 90% in the shares of companies that make up the Benchmark Index and in similar proportions to their weighting in the Benchmark Index.
- The Benchmark Index is comprised of shares in companies that are incorporated, headquartered or which have their principal business activities in the UK.
- The Benchmark Index is designed to increase exposure to companies that demonstrate good environmental, social and governance ("ESG") efforts and targets an annual reduction in its overall carbon emissions.
- This means the Fund will invest more in companies that score well against the Manager's proprietary ESG criteria, and less in companies that do not. The Benchmark Index will be rebalanced twice a year.
- The Benchmark Index will exclude companies from sectors the Manager considers incompatible with good ESG criteria. The Benchmark Index methodology may change over time as the Manager's ability to evaluate ESG criteria changes.
- The Manager may exclude shares in companies from the Fund which do not meet the Manager's "Climate Impact Pledge", in order to encourage strong governance and sustainable strategies. The number of companies excluded could be limited by the target tracking error.
- The Fund may invest in shares in companies which are reasonably expected to become part of the Benchmark Index or are an alternative to a constituent of the Benchmark Index.
- The Fund may also invest in money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by Legal & General.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) for efficient portfolio management purposes to: • reduce risk or cost; or • generate additional capital or income with no, or an acceptably low, level of risk.
- An up-to-date overview of the Benchmark Index, including excluded sectors is available on Solactive's website: **Solactive L&G Enhanced ESG Methodology**
- A summary of the Manager's Climate Impact Pledge is available at: www.lgim.com/climate-impact-pledge.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this fund on any business day. You need to contact us with your instruction before midday. This is the time we calculate unit prices for this fund. If you contact us after midday, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in sterling (British pounds).
- This Fund is designed for investors looking for growth and income and to increase their exposure to shares in companies that demonstrate good ESG efforts in the UK, as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- This Fund is designed for investors looking for growth and income and to increase their exposure to shares in companies that demonstrate good ESG efforts in the UK, as represented by the Benchmark Index.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund has a sustainability and/or ESG focus in its investment process which may i) limit the Fund's exposure to or exclude certain companies, industries or sectors ii) impact the Fund's investment performance compared to other funds that do not apply such criteria and, iii) differ from an investor's own sustainability and/or ESG criteria.
- Where companies in the Index are excluded from the Fund as a result of the Climate Impact Pledge, this may affect the ability of the manager to closely track the performance of the Index.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

CHARGES

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at February 2022. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

Other costs:

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.56% for purchases and 0.07% for sales at 02 December 2021. The amount of the dilution adjustment may differ in future.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

*Performance prior to this point achieved under circumstances that no longer apply

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The Fund will not replicate the performance of the Benchmark Index perfectly due to the expenses, tax and transaction costs incurred by the Fund, which are not included in the Benchmark Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2019.
- This unit class launched in 2019.
- **Effective date 15 January 2021*, the Fund changed its benchmark index.**

LIONTRUST

SUSTAINABLE FUTURE CORPORATE BOND FUND

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Corporate Bond Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon the 6 Acc class (ISIN: GB00B8BPH312). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver income with capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest a minimum of 80% of its assets in investment grade corporate bonds that are sterling denominated or hedged back to sterling. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The Fund may also invest in government bonds, collective investment schemes (up to 10% of Fund assets), sub-investment grade bonds, other fixed income securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- Macroeconomic analysis is used to determine the managers' top down view of the world and this helps shape all aspects of portfolio construction and appetite for risk. After this, the managers aim to focus on high-quality issuers and believe this can reduce bond specific risk. Their assessment of quality is a distinctive part of their process, in which they combine traditional credit analysis with a detailed sustainability assessment based on their proprietary model.
- The fund managers assess individual bonds for whether they believe the bonds offer attractive long-term returns and for absolute and relative valuations. There is no point in investing in a bond merely because it is cheap relative to others in the sector if the fund managers believe the total returns are not attractive to the end investor.
- The fund managers seek the best value bonds issued by high-quality issuers across the capital structure, along the maturity curve and that have been issued in the primary credit markets (UK, US and Europe).

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 4 primarily for its exposure to a diversified portfolio of debt instruments along with a number of derivative positions.
- The SRRI may not fully take into account the following risks:
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund uses derivative instruments that may result in higher cash levels. Cash may be deposited with several credit counterparties (e.g. international banks) or in short-dated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- The Fund may encounter liquidity constraints from time to time. Participation rates on advertised volumes could fall reflecting the less liquid nature of the current market conditions.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or

accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.

- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Muzinich Sustainable Credit Fund

Hedged GBP Income S Units

(ISIN: IE00B4PL7R16)

a Sub-Fund of Muzinich Funds

This Fund is managed by Muzinich & Co. (Ireland) Limited,
part of Muzinich & Co., Inc.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest

Objectives and Investment Policy

Investment Objective

The Fund seeks to protect capital and generate attractive returns which exceed those available from similar duration Benchmark Government Bonds.

Investment Policy

The Muzinich Sustainable Credit Fund invests primarily in corporate bonds (securities that represent an obligation to repay a debt along with interest). These bonds are issued primarily by European and North American companies. The Investment Manager chooses companies on the basis of compelling risk/ reward characteristics and industry leading Environmental, Social and Governance (ESG) risk management characteristics. The Investment Manager will apply specific socially responsible exclusion criteria and will not invest in companies that are listed on Norges Bank Investment Management (NBIM) exclusion list.

The portfolio maintains an average investment grade rating, but may be up to 40% invested in sub-investment grade bonds. In order to control risk, the portfolio is well-diversified across more than 50 issuers and 15 industries.

The Investment Manager may use derivatives to hedge investments in the Fund's securities and their related assets, markets and currencies. Derivatives are financial instruments whose value is linked to the price of an underlying asset.

The Fund is actively managed and run on an entirely discretionary basis. The Fund is not managed in reference to any benchmark.

Fund Currency

The reference currency of the Fund is Euro.

Currency Policy: The Manager endeavours to reduce currency risk this unit class could face from assets held in currencies different from the unit class currency. For this purpose, the Manager may utilize derivatives such as currency forward contracts which lock in a future price for buying or selling currency.

Income Policy

If you invest in Income Units, net income the Fund declares will be paid out to you. If you invest in Accumulation Units, net income will be reinvested in the Fund on behalf of investors.

Buying and selling units

You can buy and sell units in the Fund on any business day in London and New York (a "Dealing Day"). Purchase and sale orders must be received by the Administrator no later than 4.00PM Irish time on the relevant Dealing Day.

FOR FULL INVESTMENT OBJECTIVE AND POLICY DETAILS PLEASE REFER TO THE RELEVANT SUPPLEMENT TO THE PROSPECTUS

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Why is this Fund in this category?

Your capital is at risk. The risk category shown above is a measure of how significant the rise and fall in the unit price (or that of a similar fund/benchmark) has been historically.

Key Risks

Credit Risk: Issuers of bonds held in the Fund may default on their obligations or have their credit rating downgraded, possibly resulting in a temporary or permanent decrease in the value of those bonds. Bonds in this Fund may be sub-investment grade, meaning that they may produce a higher level of income but also carry greater risk.

Liquidity Risk: The Fund may face difficulties in purchasing or selling its assets, although it endeavors to invest in liquid securities.

Interest Rate Risk: Fixed-rate bonds held in the Fund may fall in price with an increase in the prevailing level of interest rates in the economy. This risk usually decreases for bonds of

lower rating and shorter durations.

Currency Risk: Fluctuations in exchange rates may cause the value of your investment to rise or fall. This unit class may be exposed to currencies other than the one in which the unit class is denominated. Although the Manager endeavours to protect the Fund against currency risk, such hedging, achieved through derivatives (see "Derivative Risk" below), is at the Manager's discretion and it may not be possible or practical to protect against all currency risk.

Derivative Risk: The Fund may use derivative instruments to protect against potential risks as described under the other headings in this section. Derivative instruments may rise or fall in price or may be subject to risk of non-payment or non-delivery by a counterparty. There is no guarantee that derivatives will provide the anticipated protection.

Operational Risk: Operational processes, including those relating to the safekeeping of assets, may fail, resulting in losses.

Environmental, Social and Governance Risk (ESG): A portfolio that excludes companies deemed unattractive in their ESG characteristics might underperform a portfolio that is run without regard to ESG characteristics.

Additional information about these and other risks may be found in the prospectus and supplement for the Fund, both of which are available at www.muzinich.com and www.fundinfo.com.

The Ongoing Charge figure is based on expenses for the year ending 31 December 2021.

This figure may vary from year to year.

For more information about charges, please refer to the Fund's prospectus and supplement which are available at www.muzinich.com.

Past Performance

The past performance is shown after deduction of ongoing charges, also known as "net". Any purchase/sale fees are excluded from the calculation.

The Fund was launched on 14/02/2011.

The Unit Class was launched on 25/01/2016.

Past performance has been calculated in British Pounds and is expressed as a percentage change of the Fund's Net Asset Value at each year end.

Please be aware that past performance is not a reliable indicator of future results.

Premier Miton Responsible UK Equity Fund – Class C Shares

A sub-fund of Premier Miton Growth Funds ICVC

Class C Income Shares, ISIN no.GB0004073002 (representative share class) & Class C Accumulation Shares, ISIN no.GB00BTHH0625

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The objective of the Fund is to provide capital growth over the long-term, being five years or more. Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

A minimum of 80% of the Fund's assets are invested in shares in companies incorporated, domiciled or which have a significant part of their business in the UK and up to 20% may be in other investments which may include shares in companies listed in other geographical regions such as Europe and the USA, government and corporate (company) bonds, convertible bonds (bonds that can convert into company shares), collective investment schemes, deposits cash and near cash.

The fund managers will focus on companies that act responsibly; those with a strong Environmental, Social and Governance (ESG) profile and those that it believes are part of long term themes that have a positive influence on society and the environment. At least 90% of the Fund's assets will meet both ESG and responsible investing criteria.

The long term themes will include; health and education, protecting the planet and enhancing society and will seek to avoid investing in companies that have a negative social or environmental impact. Companies across a wide range of industrial sectors can have businesses that drive or benefit from these themes, which may evolve over time.

The fund manager analyses a company on a wide range of responsible factors including specific ESG criteria such as corporate governance, management, environmental and social impact of business.

The Fund has a Committee of Reference, comprising of independent, experienced individuals from a range of backgrounds. Alongside the Investment Adviser, the Committee is responsible for reviewing and amending, where necessary, the responsible investing and ESG criteria and themes.

A Non-Financial Objectives Report will be published twice a year that will detail the alignment of the Fund's investments to the investment themes, report on the ESG criteria and proxy voting and provide other information on the responsible investing approach.

The Fund may use derivatives, warrants and forward transactions (whose value is based on the change in price of an underlying investment) for the purposes of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price). The use of derivatives in the Fund will be limited.

The Fund is actively managed which means that the fund managers will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments as well as types of investments that will be avoided, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

Income shares: any income made by the Fund will be paid out to you.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Bonds: Issued by companies or governments and similar to a loan in nature, usually paying a fixed or variable interest rate.

Corporate bonds: Issued by companies and similar to a loan in nature, usually paying a fixed rate of interest.

Convertible bonds: bonds that can convert into company shares.

Efficient portfolio management: managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth.

Hedge: an investment which aims to reduce the risk of adverse price movements in an asset or group of assets.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund excludes holdings in equities which do not meet its responsible investing criteria, this may reduce diversification across industry sectors. Reducing diversification can increase the risk of greater price volatility. The Fund holds equities which are concentrated geographically in the UK. Assets concentrated by geographic location are more vulnerable to market sentiment in that specific location and can carry a greater risk than funds holding more geographically diversified assets. Equities tend to experience greater price volatility than many other asset types such as bonds or money market instruments. The fund holds equities diversified across market capitalisations, including small and middle capitalisation companies. The return on equity of small and middle capitalisation companies tends to be more volatile than the return on large capitalisation companies.

The indicator may not take fully into account the following risks of investing in this Fund:

- Liquidity risk:** during difficult market conditions some securities, such as equities issued by smaller capitalisation companies, may become more difficult to sell at a desired price.
- Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	0.89%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are units/shares of another fund).
- For more information about charges, please refer to the Fund's prospectus.
- For the Ongoing Charge, the figure was calculated as at 31/08/2021.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 07/07/1986.
- Share/unit class launch date: 07/07/1986.
- Performance is calculated in GBP.
- Performance is net of charges (excluding entry charge) and net of tax.
- Performance allows for distributions having been reinvested.
- * On 14/12/2021 the investment objective and policy of the Fund was amended. Performance shown before this date was therefore achieved under different circumstances. Full details are available in the Fund's Prospectus.

Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

- Alcohol manufacturing
- Human rights abuses
- Poor employment practices
- Animal welfare violations
- Pornography
- Gambling
- Carbon-intensive industries
- Alcohol retail
- Nuclear power
- Polluting the environment
- Armaments
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 30 September 2021.

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.66% (Acc units); 0.66% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: Price performance based upon bid to bid prior to 21 January 2019 and single price (mid) thereafter.

Past performance is reported on a full calendar year basis.

Fund inception: 14 May 2002. I-class units were launched 1 March 2012.

Past performance should not be seen as an indication of future performance.

Vanguard ESG Developed World All Cap Equity Index Fund (UK) (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00BLLZQL34

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed All Cap Choice Index (the "Index").
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund promotes environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment. This is met by tracking the Index.
- The Index is a market-capitalisation weighted index representing the performance of large, mid and small-size shares covering developed markets around the world. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index is constructed from the FTSE Developed All Cap Index (the "Parent Index") which is screened for certain environmental, social, and corporate governance (referred to as "ESG") criteria by the sponsor of the Index, which is independent of Vanguard.
- The Index excludes shares of companies that the sponsor of the Index determines to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: Vice products, Non-renewable energy, Weapons, and Controversies.
- The Fund's investments will, at the time of purchase, comply with the ESG requirements of the Index, except as otherwise described below regarding the use of derivatives or in the Prospectus. The Fund may hold securities which do not comply with the ESG requirements of the Index until such time as the relevant securities cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra

income or growth (known as "efficient portfolio management").

- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on:
<https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC (the "Prospectus"). See the Practical Information Section for details of how to obtain a copy of the Prospectus.

Further information on the composition of the Index may be obtained at "<https://www.ftserussell.com/products/indices/global-choice>" [ftserussell.com] and "https://research.ftserussell.com/products/downloads/FTSE_Global_Choice_Index_Series_Ground_Rules.pdf?_ga=2.210016213.13347-05923.1582045124-337685920.1582045124"

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Accuracy risk. There is no assurance that the Index provider will compile

the Index accurately or that the Index will be determined, composed or calculated correctly.

- Environmental, Social and Governance risk. A Fund may track an index which screens out possible investments if they do not meet certain environmental, social and governance ("ESG") criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order for example, to correct an error in the selection of index constituents.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor.

The ongoing charges figure is based on expenses for the year ended 31 December 2021. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>

Past performance

• Past performance:

1. **Is not a reliable indication of future performance.**
 2. Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
 3. Has been calculated in GBP.
- Shares in the Fund were first issued in 2020. This share class was launched in 2020.

Practical information

- **Depository:** The Vanguard Investments Funds ICVC ("VIF") depository is State Street Trustees Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for VIF, along with the latest published prices of shares and other information on the Fund, from our website at <https://global.vanguard.com>. These documents are available in English and are free of charge.
- **Sub-funds:** VIF is an umbrella fund with segregated liability between sub-funds. This means that the assets of the Fund are maintained separately under law from the assets of the other sub-funds of VIF, and each sub-fund is insulated from any liabilities or claims associated with the other sub-funds.
- **Prices:** The last published prices of units in the Fund are also available from the FT's website www.ft.com or <https://global.vanguard.com>

Vanguard U.S. Government Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Acc
ISIN: IE00BFRTDB69

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg U.S. Government Float Adjusted Bond Index (the "Index").
- The Index includes US dollar-denominated US government and government related bonds with maturities greater than one year.
- The Fund attempts to:
 - Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the "Past performance" section below, the performance of this share class is

shown against the Bloomberg U.S. Government Float Adjusted Bond Index Hedged in GBP (the "Hedged Index"), which is a currency hedged version of the Index.

- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc Prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Gravis UK Infrastructure Income Fund (the "Fund")

a sub-fund of VT Gravis Funds ICVC (the "Company")

Class I - Net Accumulation Shares (£)(ISIN: GB00BYVB3T96)

Class I - Net Accumulation Shares (€ - Hedged)(ISIN: GB00BYVB3V19)

Class I - Net Accumulation Shares (\$ - Hedged)(ISIN: GB00BYVB3W26)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to generate income and preserve capital with potential for capital growth.

The Fund will aim to meet its objectives by investing primarily (at least 70%) in equities (which are mainly listed in the United Kingdom and whose primary activity is in the wider infrastructure sector of the United Kingdom).

In addition to investing in equities, the sub-fund may also invest in other transferable securities, bonds, collective investment schemes, money market instruments, deposits, cash and near cash.

The Fund will have a specific focus on investments denominated in Sterling, which are themselves invested in Sterling assets and which have most or all of their activities within the UK. Other than as noted above, the Fund has no particular emphasis on any geographical area or industry or economic sector.

The Fund has the discretion to invest in a range of investments as described above.

Hedged Share Classes aim to protect investors from exchange rate fluctuations between the Fund's underlying investments and the currency of denomination of the Class (Sterling).

You can buy and sell shares in the fund on any business day.

Any income from the Fund will be reinvested to grow the value of your investment.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 5 because weekly historical performance data indicates that it has experienced relatively high rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease. Currency hedging techniques applied to hedged Share Classes may not entirely eliminate the effects of changes in exchange rates, therefore it cannot be guaranteed that the hedging objective will be achieved.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4%*
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year

Ongoing charges	1.52%**
-----------------	---------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The ongoing charges figure is based on expenses and the net asset value as at 30 June 2022. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution adjustment on entry to or exit from the fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

**The ACD may waive the initial charge at its discretion.*

***The Investment Adviser of the Fund has undertaken to absorb any costs that would otherwise cause the Class 1 shares of the Fund to have ongoing charges (excluding underlying collective investment undertaking holding charges) in excess of 0.65%.*

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart opposite is net of tax and charges but excludes the entry and exit charges that may be paid on the purchase and sale of an investment.

The share classes and Fund were launched on 25 January 2016.

Performance is calculated in Pound Sterling.
