Performance figures up to 30th September 2022

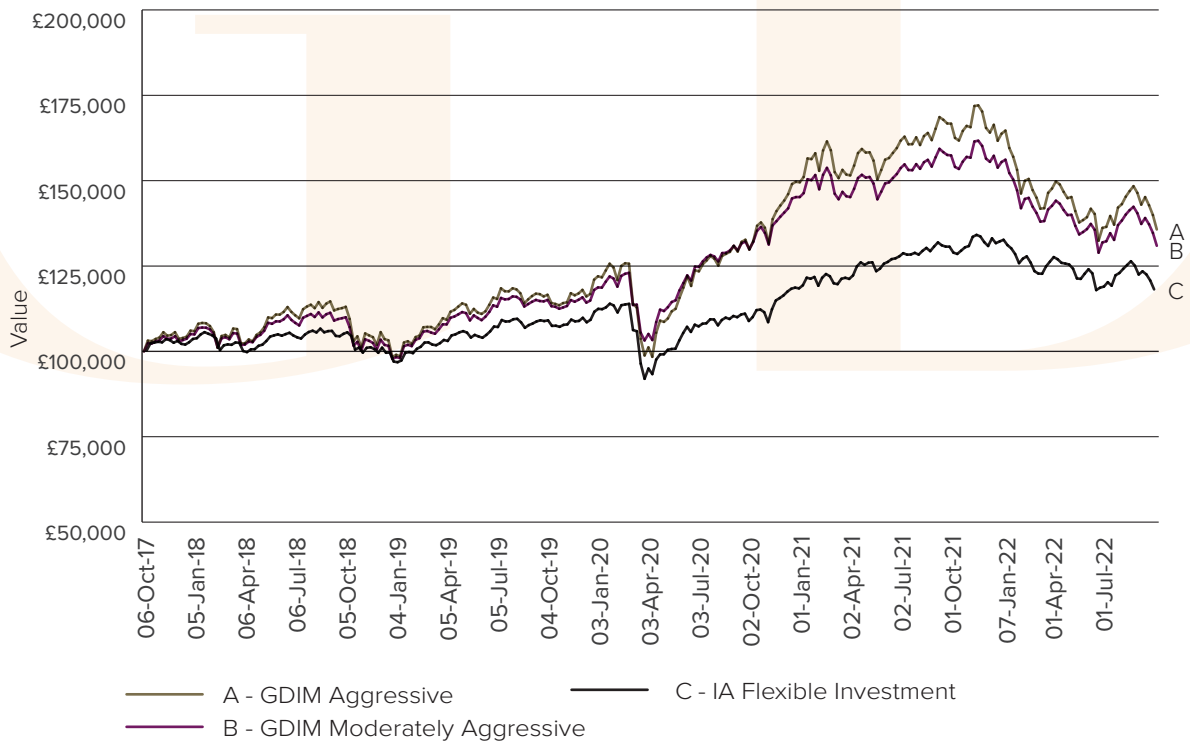

These figures are representative of the performance of an Investment Model Portfolio initiated on the 17th April 2009 (excepting the GDIM Target Return, which was inceptioned on 12th July 2012) and rebalanced in-line with the latest portfolios whenever changes were recommended. Performance does not reflect trading in actual accounts (and is therefore gross of all management fees except

fund charges) and is provided for information purposes to indicate historical performance on a Bid-to-Bid basis. Past performance should not be seen as a guide to future returns. Returns from investments of this type are not guaranteed. Capital can fall as well as rise. Data provided by Financial Express 2022.

Defensive Portfolios – 5 Year Performance

Aggressive Portfolios – 5 Year Performance

Benchmarking

The above graphs show representative returns for Gibbs Denley Investment Management (GDIM) Investment Model Portfolios on an initial investment of £100,000 over 5 years to the 30th September 2022, against some relevant benchmarks. We have split the data to show more relevant information for the risk levels associated with each portfolio, especially for the more defensive ones. The Cautious, Conservative and Balanced

portfolios are shown against inflation and the relevant Investment Association (IA) sector averages. The Aggressive and Moderately Aggressive portfolios are represented alongside the IA Flexible Investment sector, which allows up to 100% in equities. The IA sector data is the average performance based on all funds within that group. Performance information is based entirely on the funds actually recommended to clients via Investment Model Portfolios.
